

## LAB 4–Multimedia & Geolocation

1. Let's work with video.
  - a.) Download a mp4 video.
  - b.) Add <video> tag into your webpage. Add source file. Ensure the id is "Vid".
  - c.) Add following events after step (b).

```
<button onclick="playPause()">Play/Pause</button>
<button onclick="wide()">Wide Screen</button>
<button onclick="mute()">Mute</button>
<button onclick="unmute()">Unmute</button>
<button onclick="replay()">Loop</button>
<button onclick="noLoop()">Stop Loop</button>
```

- d.) Add the script after step (c).

```
23 <script>
24   var movie=document.getElementById("Vid");
25
26   function playPause(){
27       if (movie.paused)
28           movie.play();
29       else
30           movie.pause();
31   }
32   function wide(){
33       movie.width=600;
34   }
35   function mute(){
36       movie.muted=true;
37   }
38   function unmute(){
39       movie.muted=false;
40   }
41   function replay(){
42       movie.loop=true;
43   }
44   function noLoop(){
45       movie.loop=false;
46   }
47   function narrow()
48   {
49       movie.width=340;
50   }
51 </script>
```
